

STAROS

Switch between tablet app modes, web pages and playing media all within one UI. Staros is the custom kiosk lock down application that protects your information while streamlining all device activities into one simple process and integrates seamlessly to all businesses.

Restrict third party access

Locking down your device prevents other parties from making changes to the device and accessing private information.

Increase productivity

Prevent end users from download and accessing other apps that are not related to their line of work.

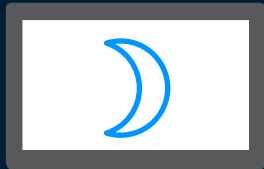

Auto lockdown

Staros locks automatically within seconds if no user activity has been detected.

Energy efficient

Use the display schedule feature to set device startup and shutdown time to save energy and money.

Set a screensaver

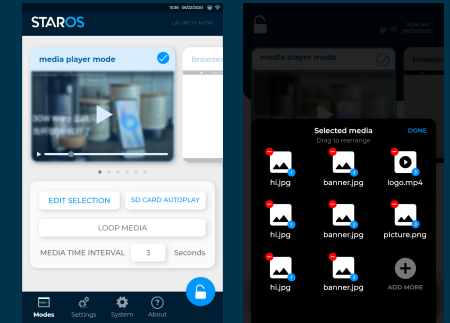

Users can display a logo or an ad after a specific time has passed and no user activity has been detected.

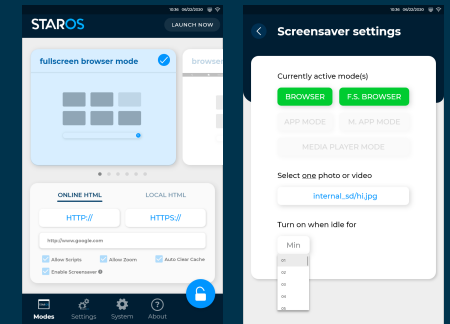

Tested for Glory Star tablets

Enjoy this all in one kiosk solution designed and tested on all Glory Star series: **Nebula, Jarvis, Vega, Epsilon.**

Display photos and videos

Browser mode with screensaver

Easily switch between multiple apps
